

## **WATER RESOURCES RESEARCH GRANT PROPOSAL**

**Project ID:** HI1501

**Title:** Technology Transfer

**Focus Categories:** Education, Groundwater

**Keywords:** information transfer, public education, information dissemination

**Start Date:** 03/01/2001

**End Date:** 02/28/2002

**Federal Funds:** \$6,998

**Non-Federal Matching Funds:** \$17,425

**Congressional District:** Hawaii, 1st

**Principal Investigator:**

Philip Moravcik

Research Associate, University of Hawaii at Manoa

**Abstract**

The Technology Transfer project endeavors to disseminate the results of water research projects conducted by University of Hawaii researchers through seminars, bulletins, public presentations, one-on-one communication, web-pages, conferences, and workshops. These activities inform state and local agencies concerned with the management of water resources about the capabilities and activities of the academic community, in order that these agencies might take advantage of our expertise to better manage such resources.

In addition to research dissemination, the Technology Transfer office provides basic water information to the interested public, and assists other organizations in the fulfillment of similar missions.
